EDUCATION

Dronacharya College of Engineering

Bachelor of Technology (B.Tech), Computer Science and Engineering; CGPA: 8.69

Gurgaon, Haryana

2024 – 2028

EXPERIENCE

Open Source Contributor - MoFA and MoFAClaw

Feb. 2026 – Present

Rust, Agent Frameworks, Testing Infrastructure, LLM Tooling

- Merged **12+ upstream PRs** across **2 OSS repos**, shipping **5 linked contributions** that strengthened **Rust agent testing**, **deterministic evaluation**, and **developer automation**.
- **PR #486**: built **mofa-testing** so agent workflows can be tested **without live API calls** using **mock LLM backends**, **mock tools**, **agent-bus capture**, assertions, docs, and tests.
- **PR #888**: expanded failure coverage with **5 deterministic test primitives**: failure injection, sequenced responses, rate-limit simulation, call counting, and **MockClock** time control.
- **PR #895**: shipped CI-readable reporting with **2 output formats** (JSON/text), pass-rate summaries, failure tracking, slowest-test reporting, and builder APIs.
- **MoFAClaw PRs #70/#90**: delivered **2 developer workflows**: GitHub Actions slash-command visibility and PR-review automation with live runs, PR checks, **RBAC**, security checks, and review comments.

PROJECTS

MoFA | *Rust, Agent Testing, LLM Tooling, CI/CD, Developer Automation* | [GitHub](#)

- Built reusable agent-testing infrastructure across **3 merged MoFA testing contributions**, enabling workflows to run **without live API calls** through mock LLM/tool backends, agent-bus capture, deterministic clocks, and assertions.
- Expanded test reliability with **5 deterministic test primitives** and **2 CI report formats**, covering failure injection, response sequencing, rate-limit simulation, call counting, JSON/text summaries, failures, and slowest tests.
- Extended MoFA ecosystem developer automation with **2 MoFAClaw workflows** for GitHub Actions visibility and PR-review automation, including live runs, PR checks, **RBAC**, security checks, and review comments.

Drift | *Tauri, Rust, Next.js, FFmpeg WASM, WebCodecs* | [GitHub](#) | [Live](#)

- Built the core capture/export stack for a **privacy-first desktop recorder**: **Tauri/Rust shell**, **FFmpeg WASM/WebCodecs pipeline**, webcam overlay, timeline editing, and **MP4/WebM/GIF export**.
- Reached **4,000+ users**, **30 GitHub stars**, and **#5 Product Hunt launch**; shipped a **21 MB Windows installer** with **local-only capture/export**.

OpenLVM | *Python, Zig, Typer, Pydantic, MCP, Solana AgentKit* | [GitHub](#) | [Live](#)

- Created a **performance-first agent VM** and **testing harness** with **Zig FFI core**, **Python operator layer**, **fork/replay/snapshot/sandbox primitives**, and **CLI orchestration**.
- Received a **\$200 Agentic Engineering Grant** from Superteam; added **MCP server**, **eval store**, **chaos testing**, **CI gates**, **Solana Arena runs**, and **Next.js workbench APIs**.

Stellar-v1k / OpenClaw Control | *Next.js, JavaScript, AI Agents, OpenClaw, Minimax M2.1* | [GitHub](#) | [Live](#)

- Built an **AI prosthetic-control hub** around OpenClaw, including **dashboard**, **integration routes**, **OpenClaw config APIs**, and **agent tool plans** for Tavily, GitHub, Google Workspace, and WhatsApp.
- Designed the **control layer** for training/operating **agentic models** through OpenClaw with **OAuth-backed tools**, **secure key routing**, **dynamic skill creation**, and **observable agent activity**.

TECHNICAL SKILLS

Languages: Rust, Python, TypeScript/JavaScript, Go, Zig, C/C++, SQL

Core CS: Data Structures, Algorithms, System Design, DBMS, Operating Systems, Computer Architecture, OOP

AI/Agents: LLM Agents, Agent Runtimes, LangChain, LangGraph, MCP Servers, Tool/Function Calling, RAG/Semantic Search, Eval Harnesses, Ollama, OpenClaw

Backend/APIs: REST APIs, OAuth, RBAC, CLI Tools, GitHub Actions APIs, JSON/Text Reporting, SQLite, PostgreSQL, Redis

Frameworks: Next.js, React, Node.js, Tauri, FastAPI, Typer, Tailwind CSS, Framer Motion

Cloud/Systems: Vercel, Cloudflare Workers, Docker, GitHub Actions, Linux, FFmpeg, WebCodecs, WebAssembly

ACHIEVEMENTS

- **Hackathon Wins(5)**: **IIIT-Delhi Innovortex 3.0** - 1st / 1800 participants; **NSUT Innovision ShlokaDecode 2.0** - 1st; **HackWithMait 6.0** - 2nd; **Ctrl-Alt-Vibe / MSIT Devfolio** - 3rd; **NSUT Wreckathon** - Special Mention / 500 participants.
- **Product/Grant Recognition**: Drift reached **#5 on Product Hunt** and **4,000+ users**.
- OpenLVM received a **\$200 Agentic Engineering Grant** from Superteam.
